# Review of Fertiliser Decisions and Crop Rotations on the Murray Plains

As a follow-up to the GRDC RiskWi\$e workshops in July and August last year, Murray Plains Farmers is hosting a session to review our approach to fertiliser and crop rotations in 2024 and to plan activities to better manage risk for 2025. Despite the tough year, there's many learnings we can implement for the coming season!

The workshop will be facilitated by Tony Craddock and Emily Chambers, Pinion Advisory, and is part of the Grains Research and Development Corporation's RiskWi\$e program.

## AGENDA

TIME	TITLE	PRESENTER
4.00pm	Welcome	
4.15pm	<b>Topics for discussion</b> <ul style="list-style-type: none"><li>• With the dry season, what actions were taken in relation to nitrogen decisions? How did it help you to manage seasonal risk?</li><li>• Review yield and protein data from focus paddocks</li><li>• Calculate N balances - what might be left from 2024 that we can count towards 2025?</li><li>• Identify crop rotations that were most profitable in 2024 and what that might mean for 2025.</li><li>• Identify the RiskWi\$e group focus for the coming season.</li></ul>	<b>Tony Craddock and Emily Chambers</b> Pinion Advisory
6.00pm	Close	

Please SMS yield and protein results from your project paddocks in 2024 together with the N applications made to the paddock to Tony Craddock on 0417809317 or supply by email to [tcraddock@pinionadvisory.com](mailto:tcraddock@pinionadvisory.com) by the 7 March 2025.

## WHERE AND WHEN

**VENUE:** CAMBRAI SPORTS GROUND

**WHEN:** Friday 14 March 2025

**TIME:** 4.00pm to 6.00pm

Watch a video outlining key learnings from the crop rotations session [here](#)

## REGISTRATION

[https://MPF\\_RiskWise\\_PostHarvestMeeting\\_March.eventbrite.com.au](https://MPF_RiskWise_PostHarvestMeeting_March.eventbrite.com.au)

Registration is essential
